

WARMERS

DL1W-SS

REACH-IN WARMERS 90° TO 180° RANGE

Standard Features

- Modern, State-of-the-Art Styling
- Top Mounted Heating Plenum "Plug" Design with Circulating Fans for Uniform Temperature Distribution
- Humidity Relief Vent
- 3" Non-CFC Polyurethane Foam Insulation
- Cam-Action Lift-Off Hinges
- · Self-Closing Doors
- Magnetic Snap-In Door Gaskets
- Cylinder Lock In Each Door
- Exterior Thermostat Control with Master On/Off Control Switch
- Adjustable 6" Stainless Steel Legs
- · Heavy-Duty, Chrome Coated Steel Shelves
- External Digital Thermometer
 - Automatic Interior Lighting

Heating System

(Range 90°F to 180°F)

Electrically operated heating system is controlled by means of a highly sensitive calibrated thermostat mounted on the cabinet front. Fin strip heating elements are located at the base of the interior. Air circulating blower located in a top mounted, concealed "plug" housing distributes heat throughout product zone, assuring uniform cabinet temperatures. Cabinet top has a built-in humidity relief vent. The entire "plug" system is mounted on a sturdy steel, rail-type base which can be easily removed if refrigerator or freezer conversion is desired. A strict quality assurance team inspects all material and components to certify that each model conforms to the most exacting standards. All models are factory performance tested for a minimum of 16 hours prior to crating.

Standard (S/S Front, Aluminum Ends & Interior)

Suffix SA (S/S Exterior, Aluminum Interior)

Suffix SS (S/S Exterior & Interior)

Cabinet Construction

All materials are of top quality, assembled to conform with strict quality-assurance requirements. The cabinet front and doors are constructed of heavy-gauge polished stainless steel for durability. All cabinet joints and seams are sealed vapor-tight. Case is of all metal, welded construction and internally supported and braced for a rigid unit construction. Cabinet design eliminates overlapping panels with raw edges. Cabinet body and doors are insulated with non-CFC, foamed-in-place polyurethane foam with an average thickness of 3 inches to ensure increased energy efficiency. Automatic interior lighting is controlled by door openings. Cabinets are equipped with 6-inch adjustable stainless steel legs.

Shelving

Shelves are designed for heavy-duty use with .306" diameter frame and brace members and .140" diameter fill wires spaced ³/₄" apart. Shelves are welded steel and epoxy-coated for a durable, long, rust-free service life. Adjustments are in 1/2 inch increments and a wide door opening allows the use of a variety of optional pan and tray slide types.

Door Construction

Door shells are constructed of heavy-gauge stainless steel and are internally braced and urethane-foam-insulated for rigidity. Door corners are of welded construction and polished. Replaceable snap-in door gaskets are selfadjusting, heavy-duty, magnetic type. Door handles and hinges are chrome-plated and non-corrosive. Doors are provided with built-in cylinder locks which are keyed alike. Hinges are cam-action, lift-off type featuring positive safety stop at 120 degrees.
