Professional Techniques – P12		

Session Abstract

Ever changing risks landscape and add to that stringent regulatory requirements, having a strong and robust Governance of Risk & Compliance has moved up the priority for CISO and CIO's. Adoption of cloud has added to the challenges to manage risks and adhere to compliance requirements. This presentation will outline how GRC is adopting to cloud and what will be the ecosystem for GRC when companies migrate to cloud. The presentation will help identify how different components of GRC will come together to help companies to have a strong and robust GRC framework in cloud.

Target Audience

IT Manager; CISO, CIO, IT Governance, IT Auditor, Chief Compliance Officer.

COBIT Objectives

- Ensure compliance with external requirements
- Define the IT organization and relationships
- Assess risks
