

# The ABC's of BCP

Jeremy Sucharski

Governance Risk and Compliance – G31

# Jeremy Sucharski, CISA, CRISC

- Over 12 years of experience
- CISA and CRISC Certifications
- Governance, Risk and Compliance Practice Leader at Armanino McKenna
- Cal Poly SLO and Deloitte & Touché ERS Alumni
- Experience with:
  - SOX
  - SOC/SAS70
  - IT Audit Support
  - Information Security
  - Process Optimization
  - Contract Assurance
  - DR & BCP
- Have designed implemented, tested and audited DR and BCP plans for companies of varying sizes and industries.

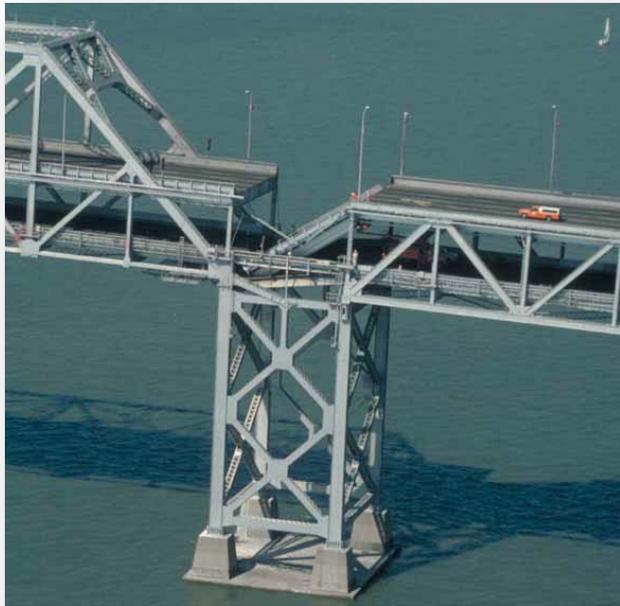

# Session Topic Overview

- Business Continuity Statistics
- Dispelling BCP Fallacies
- Business Continuity Planning Process
- Steps for Success
- Audit Considerations
- Question and Answer Throughout

# Dilbert's Wisdom

# A Matter of Perspective

Which of these scenario's comes to mind when you hear "Business Continuity" or "Disaster Recovery"

# Commonality?

= ?

# Why are DR and BCP Important?

71%

- 71% of companies have some form of DR or Business resumption Plan

59%

- 59% of plans were updated in last year

82%

- 82% were tested in past year

# Why are DR and BCP Important?

90%

- 90% of companies who cannot recover operations within 5 days go out of business within 1 year

# Why are DR and BCP Important?

- Top 3 Causes of Unplanned System Outages:
  - System Upgrades and Patching
  - Power Failure/Issue
  - Fire
- Average Cost of an Unplanned Outage:
  - \$287,000

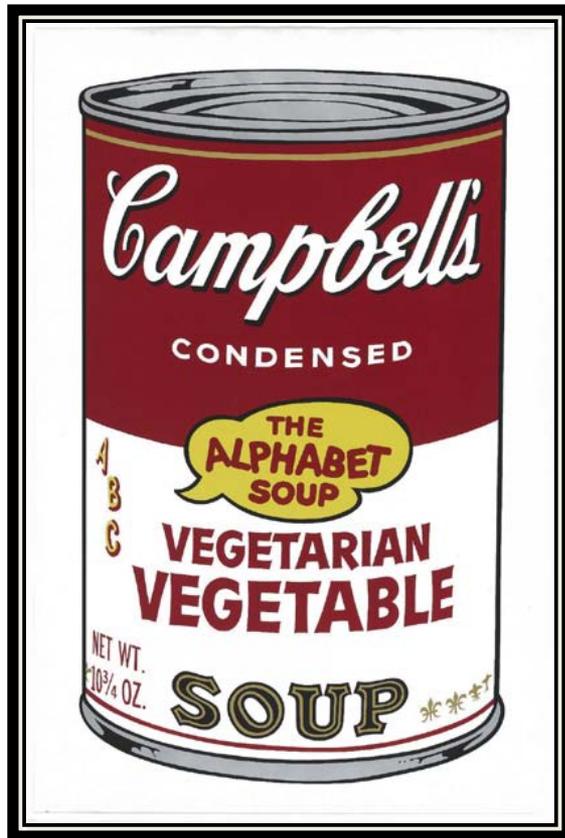

# Business Continuity Fallacies

- One Time Event
- Executed in a Vacuum
- Only focused on IT Systems
- An absolute assurance
- Disaster Recovery Planning
- Focused only on large disasters
- An ongoing Process
- Part of the company culture
- Basis For *Reasonable* Assurance of recovery
- Process to mitigate risks
- Focused on Critical Processes

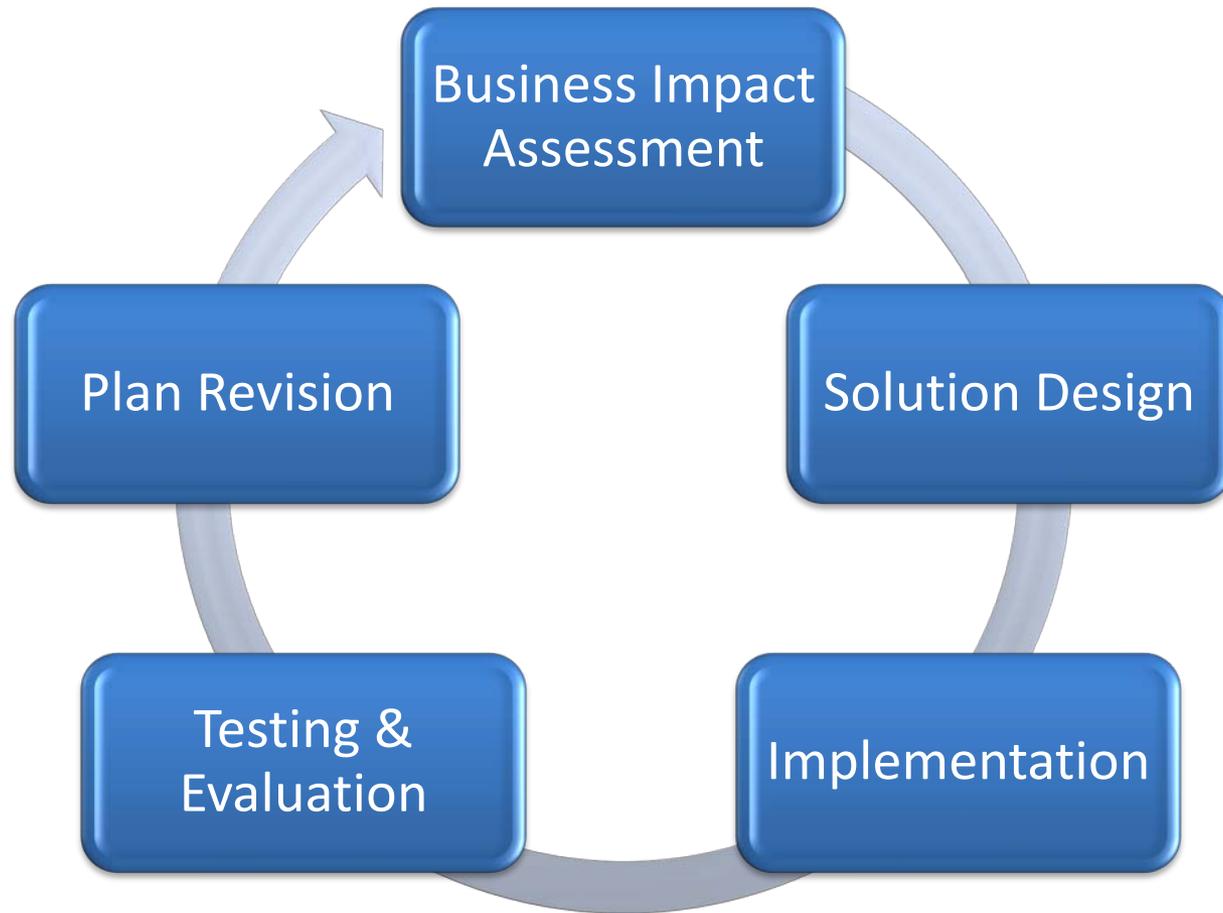

# Alphabet Soup

- Key Acronyms to know before beginning the BCP Process
  - BCM
  - BCP
  - DR
  - RTO
  - RPO
  - MTPD

# Components of Effective Business Continuity Planning

# Planning Is Everything...

# Business Impact Assessment Components

Data  
Gathering

Inventory

Analysis

Reporting

# Data Gathering

- Begin by “defining” your organization
- Communicate process to entire company
- Identify key individuals to participate in the process
- Ensure that this includes a cross section of:
  - Job functions
  - Positions / Levels
  - Responsibilities

# Data Gathering

- Develop a standard output for your interviews
  - Summary information
  - Dependent Applications
  - Related or Dependent Processes
  - Peak Periods/Seasonality
  - Loss Impact Analysis
  - Process Description
- Request supporting data throughout
- Leverage Data Gathering for educating company

# Inventory

- Compile what you learned in your interviews and other data gathering
  - Hardware
  - Software
  - Processes
  - Locations
  - Owners
- “You cant analyze what you haven’t discussed.”

# Analysis

- Leverage output from Data Gathering and Inventory Phases
- May include a wide variety of analysis categories including:

# Loss Impact Analysis

Loss Category	Weight	Score (1-5)	Weighted Average	Comments
Financial	68			
Reputation	10			
Client Service	10			
Operational Ability	10			
Safety	1			
Legal & Regulatory	1			

~Example Loss Impact Analysis Criteria Matrix~

# Reporting

- Audience
  - Executive
  - Managerial
- Format
  - Include formats that can be leveraged in Solution Design
    - e.g. tables of action items, etc.
- Frequency
  - Initial Reporting
  - Status Reporting

# Reporting

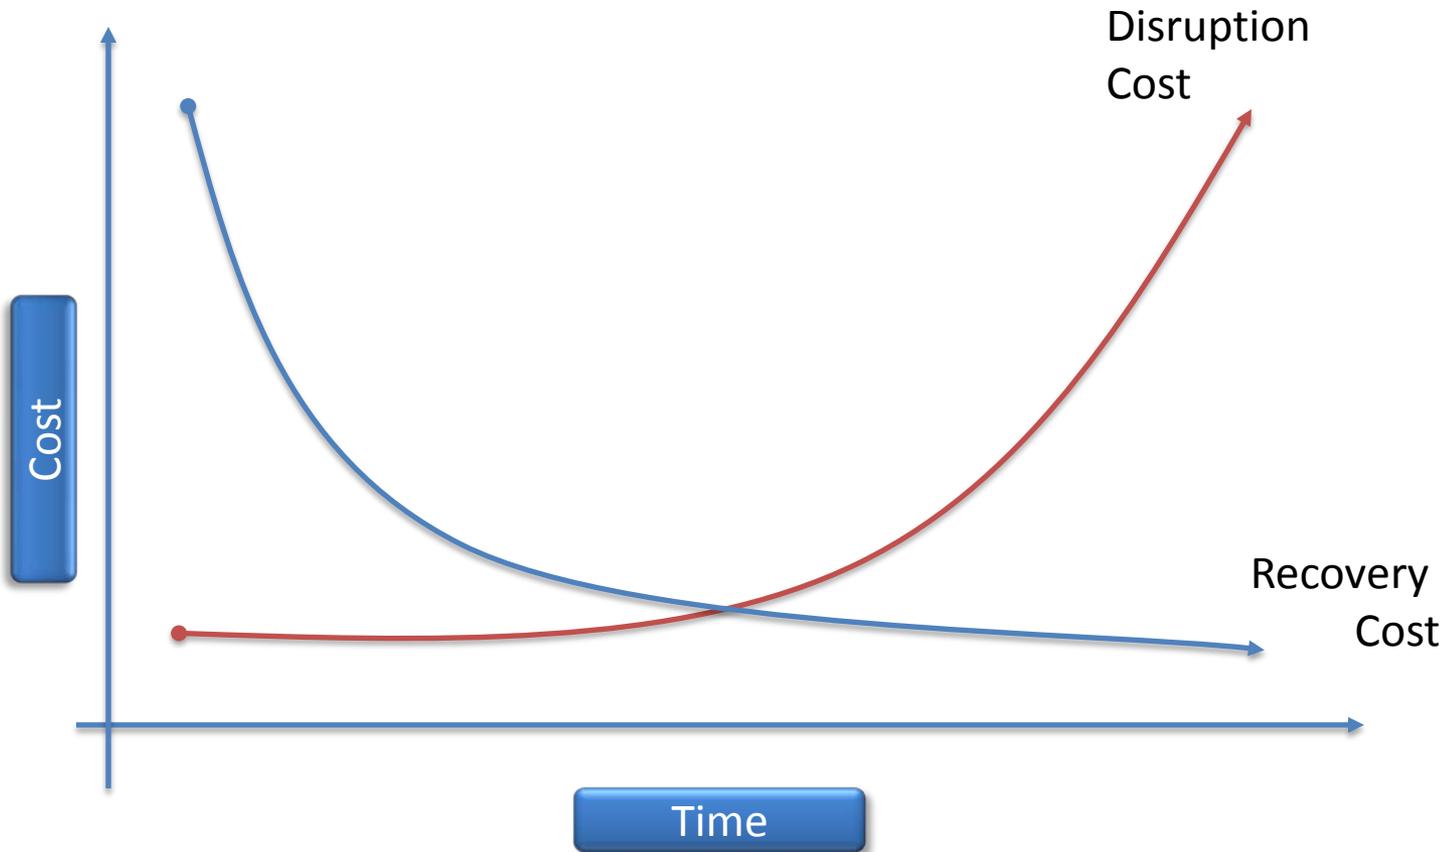

## Table of Contents

---

I. Executive Summary .....	5
II. Process Overview .....	7
III. Downtime Analysis .....	9
IV. Peak Time Analysis .....	17
V. Environment, Location & System Analysis .....	23
VI. Departmental Risk Analysis & Process Evaluation .....	28
VII. Summarized Project Plan .....	157
VIII. Detailed Project Plan.....	160
IX. Changes of Opportunity & Identified Risks .....	177
X. Appendix A: Business Impact Assessment Participants .....	185
XI. Appendix B: Loss Impact Analysis Criteria:.....	188

# Solution Design Challenge

# Solution Design

- Evaluate Recovery Strategies
  - Hot
  - Warm
  - Cold
  - Cloud
  - SaaS
  - Reciprocal agreements
  - Local
  - Geographically Separate
- Identify Primary and Recovery Locations
- Translate recovery requirements into actions for IT

# Solution Design

- Identify alternative work locations
- Identify executive recovery location
- Evaluate business interruption insurance
- Evaluate recovery priority

# Solution Design

- Define recovery approach
- Form recovery team
- Document and Communicate Implementation Plan
- Fold into existing IT plans (if possible)
- Leverage SME's
- Categorize Tasks/Effort:
  - Technology
  - Process
  - Training and Education

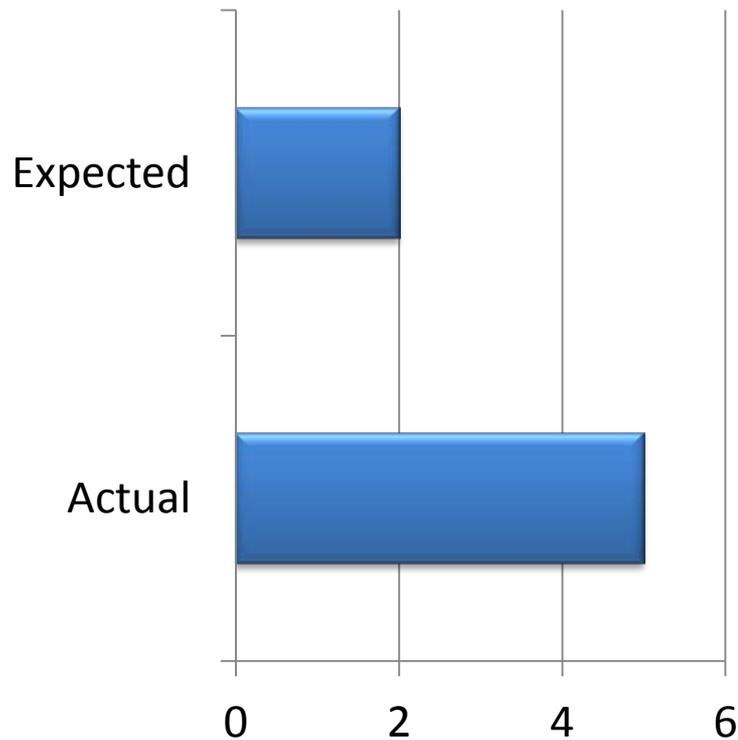

A vertical illustration on the left side of the slide shows a person in a blue suit from behind, holding a yellow sign that says "Enter office". In the background, there is a tall building with many windows, some of which are glowing blue. The sky is a mix of blue and grey, suggesting a cloudy or overcast day.

# Solution Design

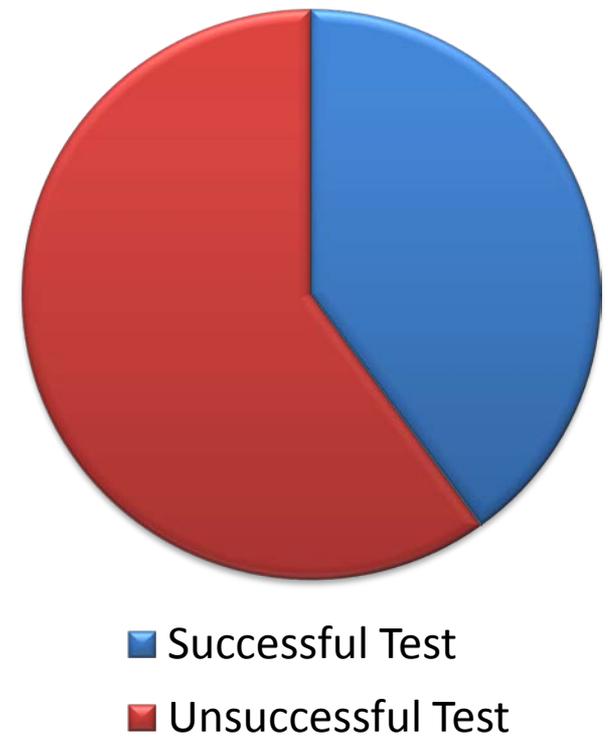

- Emergency communication process
- Emergency response procedures
- Emergency leave and pay policy
- Define departmental recovery plans

# How Good Is Your Plan?

## Outage Duration

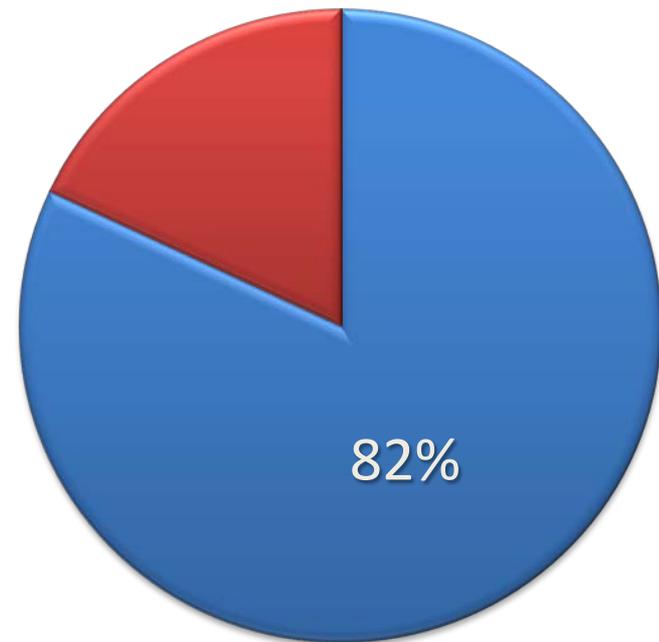

## Testing Success

# Testing & Improvement

- Test Your Plan
  - What % of companies test their DR or BCP plans more than annually?

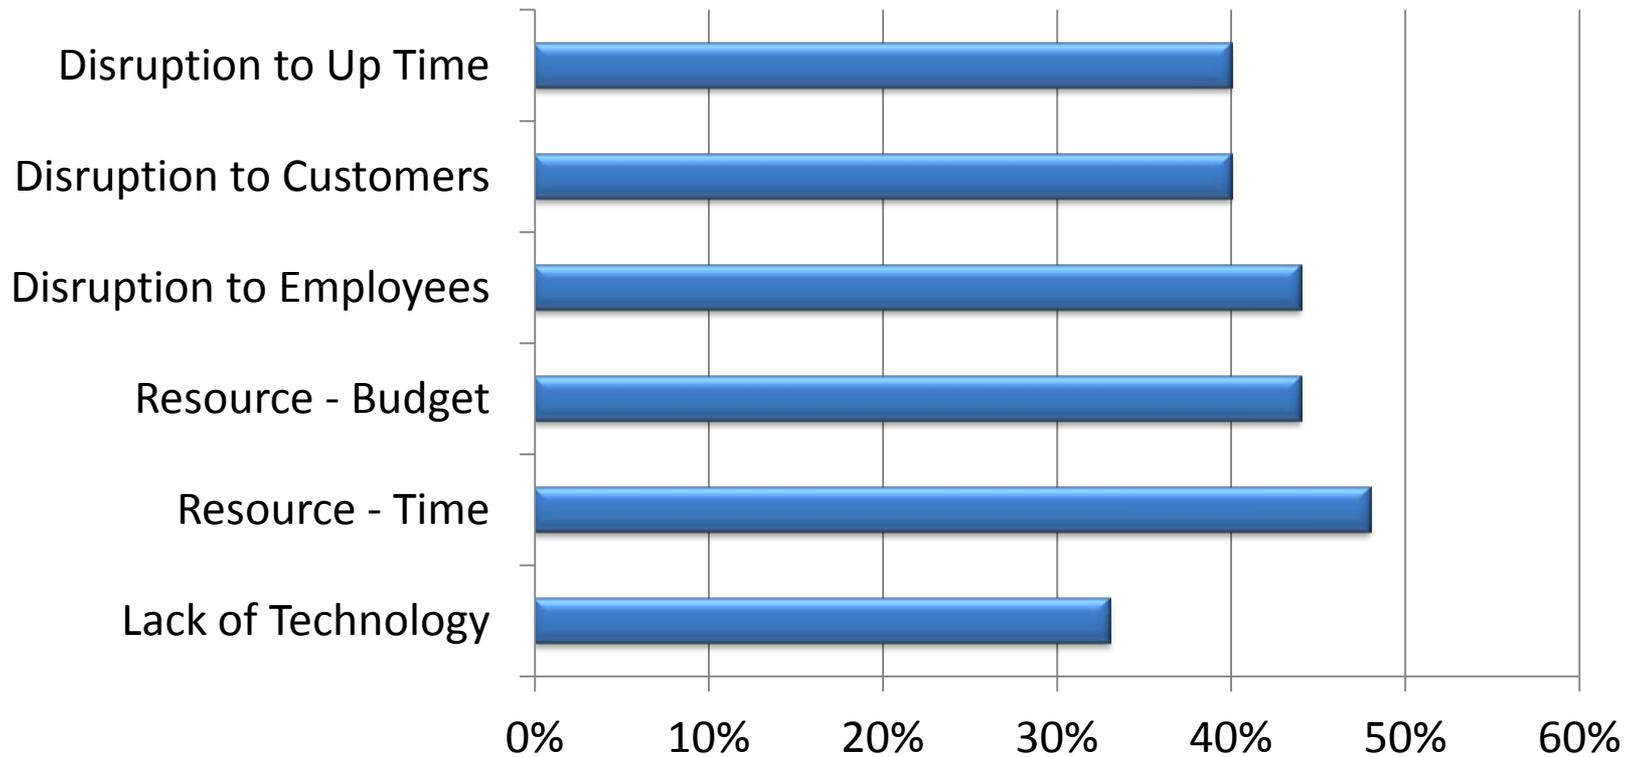

Frequency of Testing

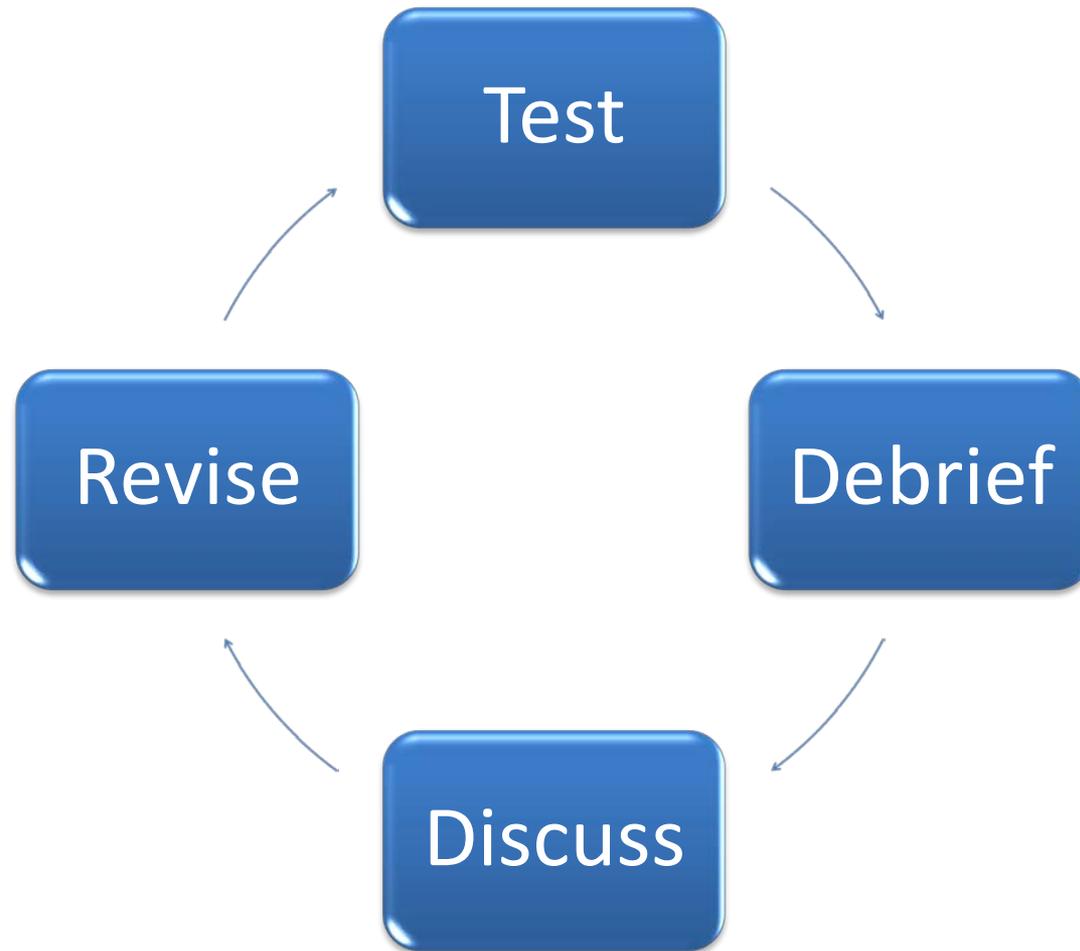

- More Than Annual
- Less Than Annual

# So Why Skip The Testing?

## Reasons for Lack of Testing

# Testing & Improvement

# Testing & Improvement

- Types of Testing:
  - Table Top Testing
  - Crisis command team call-out testing
  - Fail Over Testing
  - Technical swing test from primary to secondary work locations
  - Full Recovery Exercise

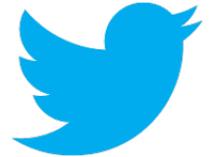

# Trends

- BCM is #2 area of increased IT Spending
- Increased Focus at C-Suite
  - Driven by:
    - Strategy
    - Compliance
    - Business Environment
- Integrating BCP, ERM and Risk Assessment

# Trends

- Virtualization
- Cloud
- Mobile
- Social Media
- Big Data
- ISO 22301

# Audit Considerations

- BCM Team Organization and Communication
- Policy, Standards and Procedures
- BIA
- Risk Assessment
- Documentation and Distribution

# Audit Considerations

- Testing
  - Frequency
  - Type
  - Results
- Maturity Assessment

**What Questions  
Do You Have?**
