## IT Governance Deep Dive

Steve Romero
IT Governance Evangelist, Romero Consulting

Governance, Risk & Compliance – G21 & G22

Session Abstract

Get ready to go deep. For over 10 years, SF ISACA Chapter member Steve Romero been evangelizing IT governance around the world. He has delivered constantly evolving views and theories in our Fall Conference since 2005. If you attended any of these presentations you have seen him blast through a huge amount of content in 90 minutes. Now we are all getting together to slow it down, catch our breath, and take a deep dive into IT governance because we have scheduled over two concurrent sessions.

You will gain a comprehensive understanding of the discipline from the perspectives of the most prominent IT governance authorities, such as ISO/IEEE, ISACA (COBIT5), and MIT's Center for Information Research (CISR). You'll explore and consider a radical view of IT governance that challenges conventional wisdom while providing an alternative perspective that can change the way an organization looks at IT governance and dramatically increase the potential for realizing incredible business value. You'll leave with a sound foundation in IT governance and new ideas about the discipline which will continue to provoke thought and consideration upon return to your enterprise.

Target Audience

Anyone that has anything to do with enterprise information technology – business as well as technical professionals – from the entry-level analyst to the most seasoned experienced executive.

Speaker Bio

Steve Romero is a published and globally recognized IT governance evangelist and IT business value strategist. His mission is to help enterprises realize the full potential of their IT investments for strategic and competitive advantage. He speaks around the world to companies in every business sector, federal and state government agencies, industry organizations, students, and information technology and business luminaries to identify and communicate leading advances in business governance and business management of IT.

Steve is an active member of the Project Management Institute (PMI) and Information Systems Security Association (ISSA). He is a San Francisco Chapter committee member of the Information Systems Audit and Control Association (ISACA), and a Past-President of the Information Technology

Service Management Forum (itSMF) San Francisco Local Interest Group. He is a Board Member for the Center for Electronic Business at San Francisco State University, and is a regular guest lecturer in their Master's Program. He is the author of the CA Press book, "Eliminating 'Us and Them' – Making IT and the Business One."
